

Software Requirements Specification (SRS)

Project: LifeTrack AI – AI-Powered Productivity & Habit Analytics PWA

Version: 1.0

1. Project Overview

LifeTrack AI is a Progressive Web App (PWA) that helps users build consistent habits, track goals, visualize long-term progress, and receive AI-powered productivity insights.

2. Objectives

- Daily habit tracking
- Goal management
- Long-term analytics
- AI-powered suggestions
- Productivity score
- Secure authentication
- Responsive PWA

3. Target Users

Students, developers, professionals, freelancers, fitness enthusiasts, and anyone who wants to improve daily consistency.

4. Functional Requirements

User Module: Register, Login, Logout, Forgot Password, Edit Profile

Habit Module: Create, Update, Delete, Complete, Missed

Goal Module: Daily, Weekly, Monthly, Yearly Goals

Dashboard: Today's Tasks, Progress, Streaks

Calendar: Daily History, Monthly View, GitHub-style Heatmap

Analytics: Daily, Weekly, Monthly, Yearly Reports

AI Module: Daily Review, Weekly Insights, Suggestions

Notifications: Morning Reminder, Evening Review, Missed Habit Alerts

5. Non-Functional Requirements

Responsive, Fast, Secure, Scalable, Offline Support (PWA), Modern UI, Easy to Use.

6. Technology Stack

Frontend: React, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js

Database: MongoDB Atlas

Authentication: JWT, bcrypt

Charts: Recharts

AI: Gemini API

Deployment: Vercel, Render/Railway

7. Database Collections

Users, Habits, HabitLogs, Goals, Notifications, Achievements, AIReports

8. User Flow

Register → Login → Create Habits → Daily Tick → Analytics Update → AI Analysis → Progress Improvement

9. Future Scope

Friend Challenges, Leaderboard, Smartwatch Sync, Voice Commands, Mood Tracking, Expense Tracking, PDF Reports.

10. Success Metrics

Daily Streak, Goal Completion %, Productivity Score, Habit Completion %, Active Users, Longest Streak.

Proposed USP

Life Score: An overall score computed from Coding, Learning, Fitness, Sleep, and Health habits with AI-generated personalized recommendations.
